Since the States Government began, 12 years, Jan.

Since the Lord Protector began his Government, 7  
December 16.

Since he dyed 1 year.

A general Description of the four parts of  
the Year; and first of the *Spring*.

The *Spring* beginneth with the Suns ingress into  
the first minute of the Equinoctial Digne Aries,  
which happens with us upon Munday the 10 of March,  
3 min. past 7 in the morning; and continueth the Suns  
through Aries, Taurus, and Gemini, and causeth  
day and night to the inhabitants of the whole  
earth. Now he taketh his leave of the Southern,  
beginneth to send forth his comfortable influence  
to the Northern part of the world.

Of Summer.

This Quarter beginneth with the Suns entrance into  
the first scruple of the Tropical Digne Cancer,  
this year upon Wednesday the 11 of June, 3 min. past  
the morning, and continueth the Suns itineration  
through Cancer, Leo, and Virgo. At this time the Sun  
is at his neerest approach to our Zenith, having  
the least North declination from the Equinoctial,  
there causing the longest day, and shortest night in  
the Northern Hemisphere. About this time the Sun  
is at his Apogee, or point farthest distant from the  
Earth.

Of Autumn.

This Quarter begins with us on Saturday the 13  
September, 9 min. past 1 in the morning; at which  
time the Sun passeth into the Equinoctial Digne Li-  
brey, re-equating the days and nights through-  
out the whole world, being once more bifrontal, and  
radiating to the Arctic and Antarctic Poles;  
and continueth his perambulation through Libra, Scor-  
pio, and Sagittarius.

This Quarter takes beginning at the Suns ingreſſe into the firſt cruple of the imaginazꝝ ſign Capricorn, which hapneth this year on Saturday the 11 December, at ſeven in the morning, and continueth the Suns progreſſe through Capricornus, Aquarius, and Pſeius being now in his greateſt diſtance from our Zenith and obliquity from the Equinoctial, cauſing the ſhorteſt day & longeſt night to the Northern Hemisphere.
